

## Declaration of Intent

For Bee Pole, Inc. ( ) is the day I have chosen to do the Bee Pole across the Nation Program (north-south). Starting at 7:00 am and ending at 7:00 pm that same day, Bee Pole Inc. will place a bee pole from the shores of Lake Erie in Erie, Pa. Going south down to the Gulf of Mexico ending in New Orleans, LA.

It is Bee Pole's intention to place a minimum of 500 to maximum of 2500 native bee propagation poles at roughly one mile intervals across the nation. This seems like an impossible task, but utilizing our past partners and sponsors should ensure the success of this task. It is our intention to team up with Boy Scouts across our projected path as our labor force. We will utilize all media sources available to us to get the word out so the general public will understand what they must do and the way it should be done so that we can increase our pollinators (bees) from their current established numbers to upwards of 500 percent.

By increasing our pollinators across the our nation, we should be able to increase our agricultural output by 15 to 30 percent without using any pesticides or fertilizers, not only this season, but in years to come.

Our bees are the only insect that work on behalf of humanity and without which humanity could not exist.

Please forward your commitment to be involved with this project as soon as possible so we will be able to coordinate all aspects for a successful completion.

Please go to our web page at [www.BeePole.net](http://www.BeePole.net) to find out how to participate and share with your friends.

Sincerely,

John Petrush, CEO

for National Native Bee Program
