

National Native Bee Program
Native Bee Propagation Pole

January,8, 2024

To whom it may concern:

, 2024 a great bee symposium will be held at Tom Ridge Environmental Center hosting the greatest minds that have been dealing with the problems facing bees from across the country. At that point, Nationally, we will no longer say we don't know what causes colony collapse disorder (ccd). We will issue a paper stating what we do know and what there is that we can do to save the bee population. We will publish a fact finding paper addressing how we should go about addressing this situation. On , , 2024, which will be our National Native Bee Pollinator Day, at 1pm across the nation, we will have a Governor in every state plant a bee pole simultaneously. Starting at 2pm until dusk, we will have a concert with local talent at the Liberty Park Pepsi amphitheater, ending at dusk with fireworks ending the day's festivities.

Any and all funds provided by the Alfred P. Sloan Foundation and in conjunction with the board of trustees will be used together with G.E. Corporate sponsorship and Waste Management Corporate sponsorship towards this non profit project.

Sincerely,

John Petrush
